

## Evolution of installed power from RES (MW)

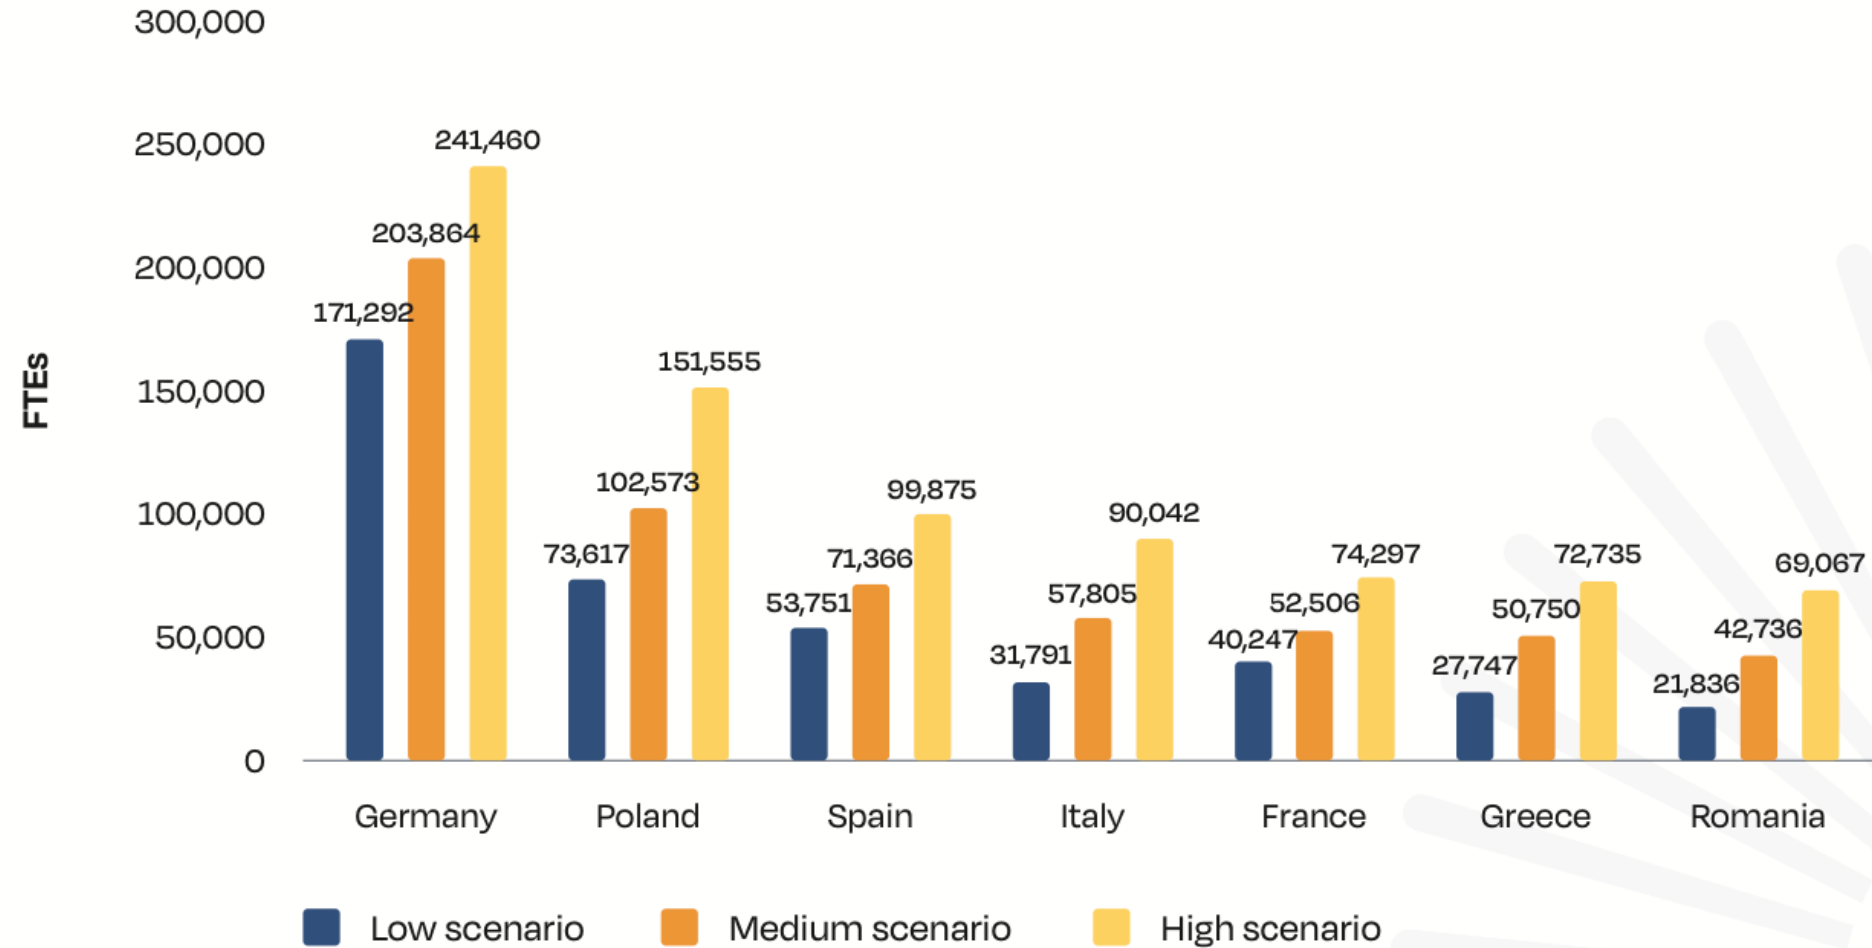

Installed capacity in Romania, by scenario  
GW

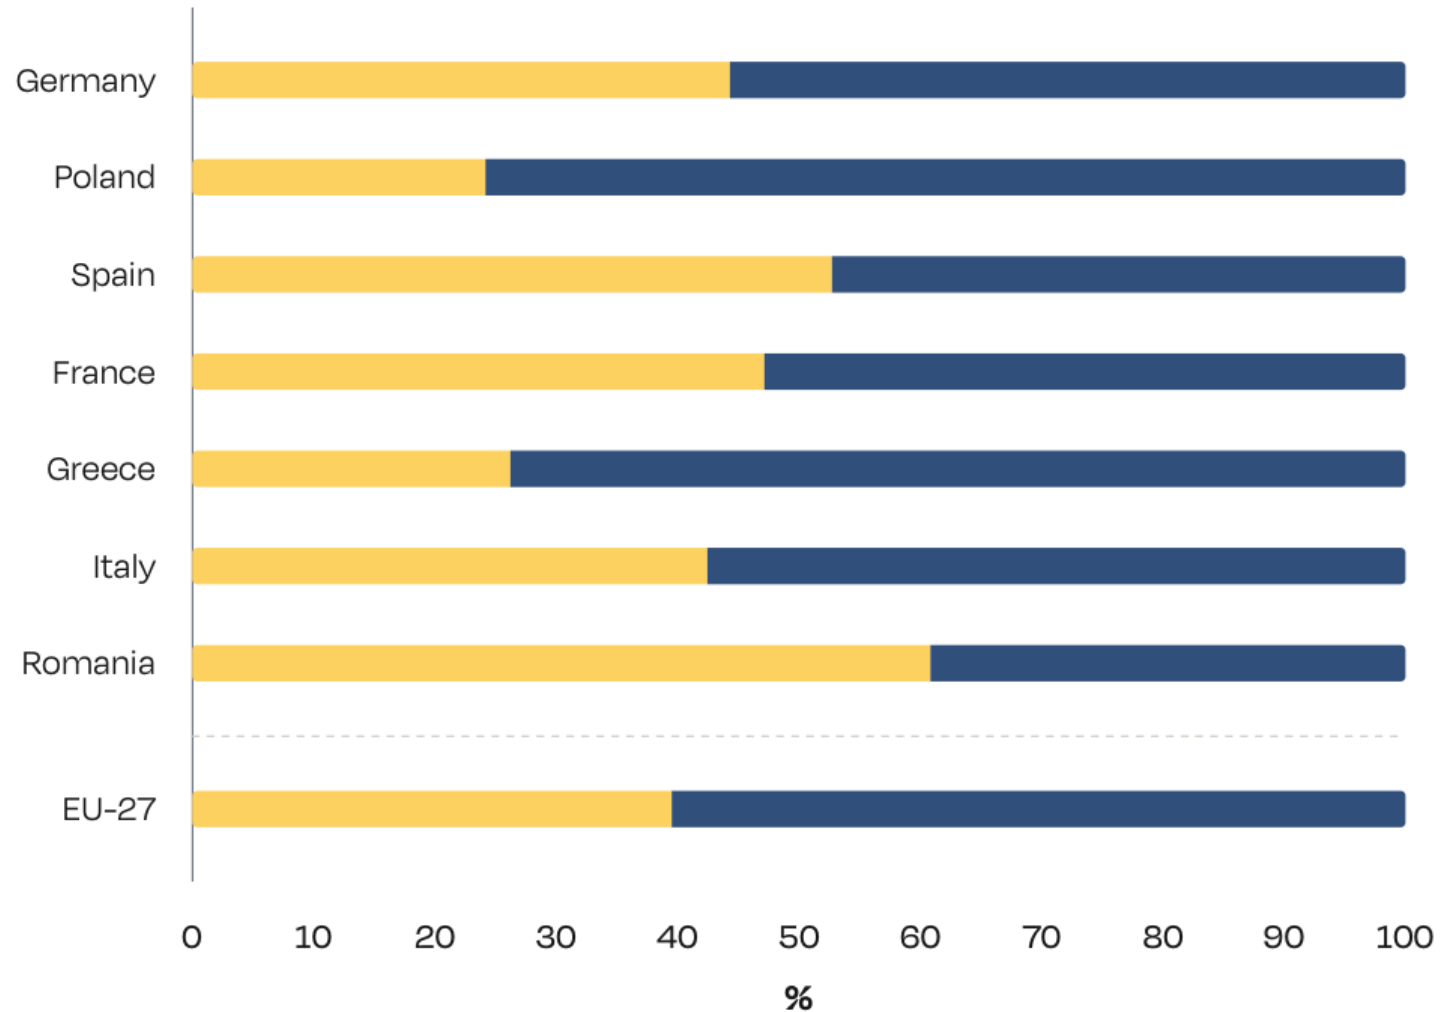

Electricity production & net imports in Romania, by scenario  
TWh

1) Renewables capacity and generation share is aligned with the European Commission's Renewables Directive targets for the power sector in 2030 which are higher than Romania's current national targets 2) Includes waste plants and on-site industrial thermal power plants 3) Peaking plants include OCGTs, reciprocating engines, and oil peakers 4) Includes OCGT and CCGT generation
